Technologies Skills

Front-end: JS, React (Specialist in Front End Architecture) HTML, CSS, Bootstrap CSS, Python
Back-end: Node.js/Express, PostgreSQL

Notable Technical Projects

Persona Portfolio Project *A web app where users can see the list of characters from the game Persona 5.* (Javascript, HTML, CSS)
- Designed and implemented a visually dynamic grid-like template utilizing advanced CSS and HTML elements. Seamlessly integrated front-end design elements while leveraging database functionalities to enhance user experience, despite the project being solely front-end focused.
- Developed an intricate filtering system utilizing JavaScript to categorize characters by multiple criteria, including name, character summary, image, and birthday. Seamlessly integrated these filters to enhance user navigation and interaction within the site's front-end interface.

Avengers Project *A web app that is designed to let users put themselves in the Marvel Universe. (React)*
- Applied a proprietary API to streamline data retrieval and enhance functionality within the project. Leveraged the custom API to optimize data management and ensure seamless integration with the project's front-end and back-end components.
- Enhances character creation by leveraging key-value pairs to construct dynamic characters, enabling users to craft heroes or villains ranging from the simplest to the most complex. Uses key-value pairs to facilitate dynamic character creation, empowering users to generate a wide spectrum of heroes or villains, from the straightforward to the intricately detailed.
- Implemented specific criteria for characters, including power level, birthplace and appearance in comic issues. These criteria can range from to the user's imagination truly creating a one of a kind character.
- Future plans for getting users to be able to generate their own custom stories using the characters' traits and OpenAI. This can be used as a basis for future creation as it will be able to create a custom origin story.

Professional Experience

Porter / Overnight Doorman (150W 82nd street)   December 2023 - Present

- Ensures the security of a ten-floor apartment complex, meticulously inspecting and maintaining all systems to guarantee functionality and adherence to code standards.

- Oversees the mail center operations of the complex, overseeing the tracking of inbound and outbound mail for tenants. Implements efficient mail delivery procedures, ensuring optimal distribution to tenants daily in compliance with building standards and tenant satisfaction metrics.

- Manages waste disposal operations for every floor of the complex, cleaning and disposing of garbage daily. Mastered efficient waste management practices to maintain cleanliness and uphold sanitation standards throughout the premises.

Inbound Team Member (Target)   April 2021 - August 2021

- Operated various devices to uphold organized aisles within the store, ensuring efficient navigation for customers. Created effective aisle management strategies, using technology provided by the company to maintain order and optimize the shopping experience for customers.

- Managed diverse produce and dry food items, strategically organizing them for efficient stocking. Developed methodical routes to expedite restocking processes and meet the 4 am deadline, ensuring timely replenishment and optimal inventory management.

- Initiated and coordinated team maneuvers to foster support and motivation among team members. Implemented strategic organizational tactics to enhance collaboration and teamwork dynamics, ensuring collective empowerment and achieving common goals.

Drivers Assistant (Advanced Networking Services)   August 2019 - November 2019

- Aided in the delivery of diverse mechanical parts to multiple Verizon servers, ensuring timely and accurate distribution. Supported logistics operations by coordinating efficient routes and optimizing delivery schedules, facilitating seamless supply chain management and client satisfaction.

- Collaboratively lifted objects weighing up to one hundred pounds with assistance from the driver, ensuring safety during transportation within Verizon facilities. Managed items of varying sizes, coordinating with the driver to navigate through the premises efficiently and uphold safety protocols throughout the delivery process.

- Occasionally collaborated in setting up cable connections for server devices, ensuring seamless integration and functionality. Provided support to optimize cable configurations, contributing to the efficient operation of server systems and network infrastructure.

Education

Pursuit   *Long Island City, NY* Advanced Software Engineering Immersive Program   2022
A one year intensive coding program teaching their students to become full-stack web developers.

Laguardia Community College   *Queens, NY* Audio Engineering   2020
Attended multiple audio engineering courses
Audio Engineering course

Mercy College   *Bronx, NY* Psychology Program   2018
Attended multiple psychology courses
Audio Engineering course
